

BEAR CREEK SERVICES, LLC

PETROLEUM ENGINEERING & WELLSITE SUPERVISION

Your Trusted Advisors www.bearcreekservices.net

Our Mission

Our mission is to manage your projects like they are our own, using our combined experiences and knowledge base to deliver solutions leading to your success.

Our Philosophy

Bear Creek's business philosophy is one of building long-term trust and understanding with you and your company in order to better serve your needs. Our people have extensive backgrounds in the employ of companies just like you.

We at Bear Creek believe that effective cost and time management blended with a practical approach to our services can be better achieved by a company whom you trust and who understands your corporate philosophy.

Let Bear Creek be—**YOUR TRUSTED ADVISORS.**

Company Profile

Bear Creek has offered vacuum trucks, frac tanks, and commercial fluid disposal since 2001 and expanded into environmental consulting in 2005. Engineering was added in 2006 with the merger of Bear Creek and McGinnis Industries, which has provided consulting petroleum engineering and wellsite supervision since 1990. Our combined expertise allows us to effectively provide comprehensive services that put our clients' needs first.

Locations:

Bear Creek is based in **Shreveport, Louisiana**, with satellite offices in: TEXAS, Dallas, Houston, and Panola County. LOUISIANA-Gibbsland and Bryceland.

OKLAHOMA, Tulsa.

Meet Your Trusted Advisors

Bear Creek's Engineering group focuses on satisfying the petroleum engineering and wellsite supervision needs of the upstream oil and gas industry.

Our technical professionals and operations staff have literally hundreds of years of combined experience. We have worked throughout the United States, with an emphasis on North Louisiana, East and Southeast Texas, Arkansas, and Mississippi. You will find us particularly knowledgeable regarding not only the formations but the vendors, regulations, and regulators of these regions.

Bear Creek knows how things are done in our own backyard.

Bear Creek's Engineering Services Include

PETROLEUM ENGINEERING

- Well planning and AFE's - drilling, completion and workover
- FracPro stimulation design and planning
- Facility, compressor and pipeline design
- Engineering and logistical oversight of well work
- Operational contract review and coordination
- Commission hearings and expert witness testimony
- Regulatory filings

WELLSITE SUPERVISION

- Daywork drilling including directional, horizontal and salt-dome
- Completions, workovers, re-entries and P&A's
- Wireline, coil tubing, and snubbing
- Stimulation - cross-linked and linear gel, CO2 foam, N2 foam, water, and hybrid fracs; acid and acid fracs
- Artificial lift - rod pumps, gas lift, hydraulic, plunger lift, ESP's
- Facility, compressor and pipeline installation

Bear Creek Adds Value To Your Projects

Hiring consultants is so much more than choosing from a list of services and resumes. It's about compatibility — a mutual understanding of this industry that can only come from being in the trenches.

Your working world has literally been our working world for years upon years. That experience gives us unique insight into your needs.

Using our degrees, certifications and professional affiliations is like expanding your staff instantly. So tell us your goals. We're with you every step of the way.

Bear Creek can get you where you want to go.
