Meet Your Trusted Advisors

Bear Creek's Environmental Consulting Division is a consulting group specializing in identification and management of environmental liabilities and risks. Bear Creek provides environmental services, compliance services and advice to oil and gas operators, producers, financial institutions, investment groups, insurance companies, real estate developers, and other professional groups throughout the South and Mid-West United States.

Bear Creek's Environmental Consulting Division provides environmental consulting with particular expertise and focus on oil and gas companies, commercial real estate and financial institution liability protection and underground storage tanks (USTs). Our team of environmental professionals can quickly and effectively identify, implement and monitor advantageous and cost-effective compliance and environmental strategies to protect you, your business and your assets. Our business approach focuses on developing the best action plan to help meet your company's environmental needs. Let Bear Creek become YOUR TRUSTED ADVISORS.

Bear Creek's Environmental Oil Field Services Include

Bear Creek's Environmental Consulting Division provides environmental consulting services, for oil and gas companies. Our experience in oilfield exploration and production provides you with Trusted Advisors that have a more practical understanding of the environmental issues facing the oilfield. With our experience, regulatory knowledge, and professional backgrounds, Bear Creek's Environmental Consulting Division can better protect oil companies from costly environmental compliance fines and cleanups. Bear Creek is actively involved in oilfield environmental projects in Arkansas, Kansas, Louisiana, Mississippi and Texas.

Bear Creek's Environmental Consulting Division's services for the Oil and Gas industry include:

- Spill Prevention, Control, and Countermeasure (SPCC) Plans
- Spill response management and remediation
- Mock compliance audits
- Saltwater disposal and injection well permitting
- Air emissions permitting and monitoring
- Reserve pit sampling and recommendations for closure, including post closure/confirmatory sampling
- Oil and saltwater contaminated soil assessment and remediation
- Real-Time, on-site assessment and evaluation for saltwater impacted soils and water
- Environmental due diligence studies for oil and gas acquisitions/divestiture activities (Phase I, II, and III)
- Expert testimony in oilfield related pollution cases
- General oilfield services – Minor well site maintenance (painting, grass cutting, firewall repairs, minor line repairs)
- NORM Surveys
- Safety training
